Stillson Pipe Wrench BS 3594 Part I

- Load bearing components. Handle, hook and jaw drop forged from special steel with dual heat treatment, which ensures unlimited wear resistance of the teeth.
- Knurled adjusting nut forged from special steel, hardened and tempered.
- Frame made from non-breakable S.G. ductile iron.
- Accurately machined screw threads and nut.
- New system of dual coil spring, which ensure immediate grip of the pipe and perfect ratchet action.
- Teeth hardened to 55 HRC.

Spare jaws and nuts are available for all sizes.
